#### SOUND

SOUND LEVEL 89 Db(a) at Operators Position

Sound tests were conducted in accordance with 2000/14/EC, as well as ISO 11094, and were performed on 8-3-2007 under the conditions listed below.

△Sound power level listed is the highest value for any model covered in this manual. Please refer to serial plate on the unit for the sound power level for your model.

General Conditions: Sunny

Temperature: 87.8°F (31.1°C)
Wind Speed: 1.8 mph (2.8kph)
Wind Direction: East South east

Humidity: 61.5%

Barometric Pressure: 30.1Hg (101.98kpa)

#### **VIBRATION DATA**

#### VIBRATION LEVEL 1.02g (10.1m/s<sup>2</sup>)

Vibration levels at the operator's handles were measured in the vertical, lateral and longitudinal directions using calibrated vibration test equipment. Tests were performed on 9-20-07 under the conditions listed below.

General Conditions: Sunny

Temperature: 86.5°F (30.3°C)
Wind Speed: 8 mph (13 kph)
Wind Direction: South Southwest

Humidity: 49.8%

Barometric Pressure: 30.1Hg (101.94kpa)

#### INSTRUCTION LABELS

The labels shown below were installed on your BILLY GOAT ® FORCE Blower. If any labels are damaged or missing, replace them before operating this equipment. Item numbers from the Illustrated Parts List and part numbers are provided for convenience in ordering replacement labels. The correct position for each label may be determined by referring to the Figure and Item numbers shown.

#### **PACKING CHECKLIST**

These items should be included in your carton. If any of these parts are missing, contact your dealer. Your BILLY GOAT <sup>®</sup> FORCE Blower was shipped in one carton, completely assembled except for the Upper Handle Assembly and Front Diverter. Mounting hardware for the Upper Handle Assembly can be found on the lower handle.

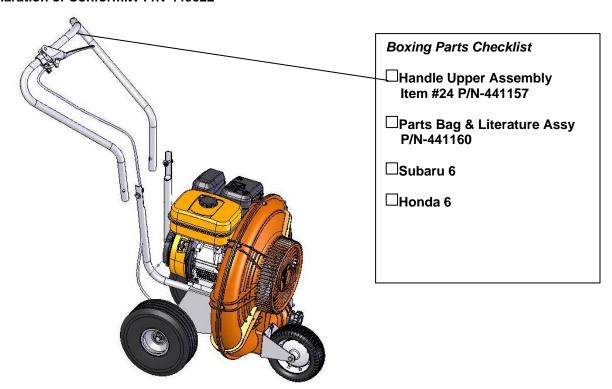

**READ** all safety instructions before assembling unit.

**TAKE CAUTION** when removing the unit from the box the Handle Assembly is attached to the unit by cables.

# PARTS BAG & LITERATURE ASSY

Warranty card P/N- 400972, Owner's Manual P/N-441242, General Safety and Warnings Manual P/N-100294. Declaration of Conformity P/N-440022

#### **ASSEMBLY**

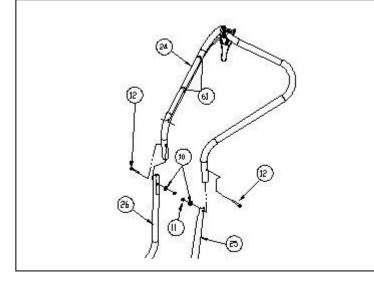

- 1. Follow the steps in figures A and B, then securely tighten all hardware shown.
- 2.Connect spark plug wire.

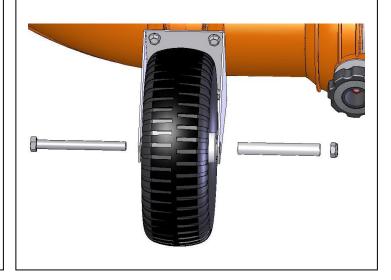

#### Figure A

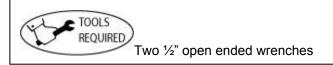

The hardware for attaching the upper handle to the lower can be found on the lower handle. Install upper handle (item 24), to preassembled lower handles (item 25 & 26) by sliding the upper over and down the inside of the lower handle. Using bolt (item #12), washers (item #10) & lock nut (item #11) to install upper handle to lower handle. Finish installing the other side of the upper handle assembly using screw and lock nut provided. The Aimand-Shoot TM is not attached, you will need to unroll the cable and attach the ball end to the lever and seat the cable end into the hole on the saddle clamp, with the cable running through the slot. To keep the cable from being damaged use three ty-wraps (item 61) to secure it to the handle, as shown making sure that the cable is not rubbing against the tire.

#### Figure B

Attach the front tire using the hardware located on the front wheel bracket. Use a block to raise the front end of the unit off the ground. Insert the wheel spacer (item 17) into the wheel and place in between the bracket. Finally insert the bolt (item 20) through the bracket, wheel, and spacer and secure with the nut (item 27)

# BILLY

#### FORCE 6 BLOWER Owner's Manual

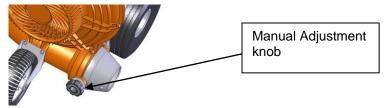

#### **BLOWING OPERATION**

Your Billy Goat Force blower is equipped with an air director cone and the patented Aim-N-Shoot TM control lever to allow the operator to direct the air stream up or down as required to assist in moving debris. This feature is extremely useful when debris has piled up to the point that it cannot be blown any farther. The air stream can be directed upward to blow the top of the debris pile over and allow the operator to continue moving more debris farther.

#### **ADJUSTING AIR DIRECTOR**

To adjust air direction, squeeze Aim-N-Shoot<sup>TM</sup> control lever. When you want to blow debris at the same angle for an extended period, choose a suitable position and use the finger controlled push button lock to lock the cone in position. For operations that do not require the use of the Aim-N-Shoot<sup>TM</sup> feature the manual adjustment knob, pictured below, can be used to permanently lock the cone into position. NOTE: be sure to release the knob when returning to using the Aim-N-Shoot<sup>TM</sup>.

DO NOT position director cone to where it will blow debris towards people, vehicles or other objects in vicinity. Flying debris may damage, harm, or cause injury to people or objects in air flow range.

### PERIODIC MAINTENANCE

Periodic maintenance should be performed at the following intervals:

| Maintenance Operation                 | Every<br>Use | Daily or Every<br>5 Hours | Every 25<br>Hours | Every 50<br>Hours | Every<br>100-150<br>Hours |
|---------------------------------------|--------------|---------------------------|-------------------|-------------------|---------------------------|
| Inspect for worn or damaged parts.    | •            |                           |                   |                   |                           |
| Check for excessive vibration         |              | •                         |                   |                   |                           |
| Inspect Impeller for cracks or damage |              |                           |                   |                   | •                         |
| Inspect for loose parts.              |              | •                         |                   |                   |                           |

#### **IMPELLER REMOVAL**

- 1. Wait for engine to cool and disconnect spark plug.
- 2. Remove housing front cover, by removing (10) screws, around outside of front cover and the exhaust knob (22) and nut(14)
- 3. Remove impeller bolt (item #29), lock washer (item #7) and washer (item #28).
- 4. DO NOT pry on impeller. Pull on center hub area only of impeller. If impeller slides off freely, proceed to (step 6).
- 5. If the impeller does not loosen, use a pry bar against the back of the hub and the plate and apply pressure to separate the impeller from the shaft. **DO NOT** use the pry bar to apply pressure to any plastic part such as the impeller or the main housing. *Using a penetrating oil can help loosen a stuck impeller.*
- 6. Reinstall new impeller in reverse order of removal.
- 7. Tighten impeller bolt. Torque impeller bolt (see parts list on page 10 for proper impeller bolt torque specifications).

#### **TIRE AIR PRESSURE**

Check at regular intervals and maintain.

Rear Tires - 20 Psi (137 kPa).

### **TROUBLESHOOTING**

| Problem                                 | Possible Cause  | Solution  |
|---|---|---|
| Abnormal vibration.                     | <ul><li>Loose or out of balance impeller.</li><li>Debris in impeller.</li></ul>                       | <ul> <li>Check impeller and replace if required.</li> <li>Clear debris with compressed air or a backpack blower (see below pictures).*</li> </ul> |
|   | · Loose engine.   | - Check engine.   |
| Engine will not start.                  | Engine not in full choke position.     Out of gasoline or bad, old gasoline.                          | Check choke position.     Check gasoline.   |
|   | <ul><li>Spark Plug wire disconnected.</li><li>Gas valve off.</li><li>Dirty air cleaner.</li></ul>     | <ul><li>Connect spark plug wire.</li><li>Turn on gas valve.</li><li>Clean or replace air cleaner. Contact a qualified service person.</li></ul>   |
| Engine is locked, will not pull over.   | · Engine problem.   | <ul> <li>Contact an engine servicing dealer for<br/>engine problems.</li> </ul>   |
| Aim-N-Shoot <sup>™</sup> lever sticking | Debris stuck around cone     Cone adjustment knob too tight     Adaptor mount nut (item 43) too tight | Clean debis     Apply silicone based lubricant to pivot points     Loosen manual adjustment knob     Loosen nut                                   |

\*Using compressed air, or a Backpack blower, you can loosen or free debris easily from the impeller and housing, which can cause wear and tear on the machine. You can manually remove debris by taking off the front housing. Note: Always disconnect the sparkplug when servicing.
