

Service Advisory

MTD-295A

MTD ENGINES (Powermore & Troy-Bilt)

Date: May 17, 2022 Revised May 23, 2022 (Please Destroy All Previous Copies).

Models Affected: 6X65 and 8X65

Serial Number Range Affected: All

Subject: Correct Identification Of Micro Kill Switch

INFORMATIONAL ONLY

NOTE: These materials are prepared for use by trained technicians who are experienced in the service and repair of equipment of the kind described in this publication, and are not intended for use by untrained or inexperienced individuals. Such individuals should seek the assistance of an authorized service technician or dealer.

NOTE: Always wear eye protection while servicing equipment. Wear hearing protection when appropriate. Always work in a well ventilated area and follow all safety precautions when dealing with combustible materials.

NOTE: Left (LH) and Right (RH) sides are determined from the operator's position and facing in the forward direction.

PURPOSE:

This Advisory is being released to identify the correct wire installation to the micro kill switch when replacing an electric starter on the above listed Powermore & Troy-Bilt engines.

ACTION REQUIRED:

When replacing a starter on any one of the above engine models follow the directions for correct wire installation to the micro switch.

Wire Identification on 6X65 and 8X65 Engines:

1. The wire labeled #2 at the top of the micro switch is the ignition module wire. See Figure 1.
2. The wire labeled #3 at the middle of the micro switch is the starter wire. See Figure 1.
3. The wire labeled #1 at the bottom of the micro switch is the engine ground wire. See Figure 1.

NOTE: Color of wires and sheathing can vary. If more than one (1) number tag is missing, trace the wire back to its origin at either the ignition module, starter or ground lug ring terminal installed under a fastener.

FIGURE 1

4. After installation, test and verify the proper start and stop function of the mower.

This Advisory is being released for informational purposes only.
