

# Service Advisory

CC-535

## SERIES 2000

Models Affected: GT2542, GT2544, GT2550, GT2554

Serial Number Range Affected: Tractors produced with RevTEK™ OCR Technology Ignition Switch Module

Date: **August 23, 2006**

Subject: **Resistor Spark Plugs**

### **IMPORTANT ATTENTION PARTS MANAGER ATTENTION SERVICE MANAGER**

Always use resistor spark plugs when servicing tractors equipped with RevTEK™ OCR Technology ignition switch module. Using Non-Resistor spark plugs could cause the module not to activate. If the module is not activated, the tractor can not be operated in reverse with the blades (PTO) engaged. *Although the unit “fails safe”, the REVERSE CAUTION MODE feature (ability to temporarily operate the tractor in reverse with the blades engaged) may not function.*

***NOTE:*** *The RevTEK™ OCR Technology ignition switch module is part of the tractor’s reverse operation safety system. This safety system must be in place and functioning as described in the operator’s manual. Never disconnect it! Always check the RevTEK™ OCR Technology ignition switch module for proper operation before returning the tractor to the customer.*

On back is a list of Resistor Spark Plugs offered by Cub Cadet.

This is being released for informational purposes only.
